

REAL-TIME LOCATION INTELLIGENCE

GYMATCH MVP

Phase 1: Entry Experience & Visual Identity Review

DESIGN PRESENTATION

VISUAL IDENTITY FOUNDATION

COLOR PALETTE

Deep Onyx Base (#0A0A0B)
Studio Grey Surfaces (#18181C)
Borders: Steel Tint (#64646C)
Lime Accent (#D9FF00)

TYPOGRAPHY

Bebas Neue: Headlines for energy and impact.
SF Pro: Body text for precision and UI clarity.

THE FEEL

Premium, high-tech, and high-intensity. Minimalist vectors ensure focus on real-time data.

THE GYMATCH BRAND MARK

LOGO LOGIC

THE ANATOMY OF THE GYMATCH MARK

The Geolocation Shell: The vibrant lime-green outer curves and sharp bottom vertex form the universally recognized silhouette of a map pin. This instantly communicates the app's foundational feature: the Real-Time Location Engine.

The 'M' Integration: The stark white, geometric lines cut cleanly through the center to form the letter 'M' for "Match."

The Negative Space Synergy: The 'M' doesn't just sit inside the design; it actively carves out the inner void of the location marker. This represents the seamless connection between finding a physical space (the pin) and finding your fitness community (the match).

THE SPLASH EXPERIENCE

The absolute minimalist entry point. No clutter.

Just the brand mark pulsing as the Real-Time engine initializes, signaling precision from second one.

ONBOARDING 01: THE RADAR

DISCOVERY OUTCOME

We sell the "Outcome" first. Instead of explaining features, we show the user that their phone is now a radar for fitness hubs.

Perfect Design: The concentric circles visually communicate constant scanning without needing complex text.

ONBOARDING 02: INTENT

PERSONALIZED FEED

The "Discipline" screen lets users personalize their intent. By selecting 'CrossFit' or 'Cardio', the app begins tailoring the partner matching algorithm.

Perfect Design: High-contrast cards with glowing active states make selection feel rewarding and high-energy.

THE TECHNICAL GATE

TRUST-BASED PERMISSIONS

Instead of a sudden system popup, this screen explains the **Why**. We tell the user that GPS is needed for real-time matches.

Perfect Design: The full-width Lime button is unmissable, maximizing the "Accept" conversion rate for Phase 1.

ENABLE ACCESS

STRATEGIC DESIGN ANALYSIS

- ✔ **Premium Aesthetic:** The Onyx/Lime combo signals a high-end, serious athletic platform that stands out from colorful, casual apps.
- ⚡ **Reduced Cognitive Load:** Using Bebas Neue for key headlines makes information scannable in high-intensity environments (like a gym).
- ⚙️ **Conversion-Optimized:** The "Value-First" onboarding strategy ensures users reach the 'Aha' moment before hitting login barriers.
- 📱 **OLED Friendly:** Pure black backgrounds save battery on modern smartphones and make neon accents "pop" with intensity.
